

Dynamic Multiplication Progress Tracker

To keep your child motivated, pick one target number-family to conquer each week rather than overwhelming them with the whole 0–12 grid at once. You can print this quick roadmap to track their summer momentum:

	Target Focus	Active Strategy	Mastered? (✓)
Week 1	The Fun 5s & 10s	Jumping Jacks on the multiples	
Week 2	The Doubling 2s & 4s	Dribbling a basketball down the driveway	
Week 3	The Lucky 3s & 6s	Sidewalk chalk target practice	
Week 4	The Trickier 7s & 8s	Jumping rope rhythm chants	
Week 5	The Magical One 9s	High-five patterns or running laps	
Week 6	The Special Ones 11s & 12s	Work outs – sit-ups, push-ups, etc.	

Multiplication Table

Print and complete

	1	2	3	4	5	6	7	8	9	10	11	12

Family discussion:

- Why do you only really need to complete half of the table?
- What is special about the cells that are marked in purple?
- Do you know any special “tricks” to remembering any of the facts?
 - 1 – anything multiplied by one is itself
 - 9 -
 - 11 -
