THE ALCHEMIST'S POTION LAB
LIQUID CAPACITY CONVERSION

Recipe: Elixir of Wisdom

You must accurately convert measurements before pouring them into the cauldron. One wrong conversion turns it into slime!

---

1 pint = 2 cups 1 quart = 2 pints 1 gallon = 4 quarts

Recipe Step 1: In a clean cauldron, add 3 Gallons of Moon Water.

- Convert this to Quarts = ____ Quarts.

Recipe Step 2: Stir in 12 Pints of Dragon Milk."

- Convert this to Quarts. = ____ Quarts.

Recipe Step 3: "Drop in 8 Cups of Liquid Sun."

- Convert this to Pints. = ____ Pints.

Recipe Step 4: "Pour in 5 Quarts of Stardust Oil."

- Convert this to Cups. = ____ Cups.

Alchemist's Challenge! How many cups of Elixir has this recipe created in total?
